## PRODUCT · BRANDING · DATAVIZ · UI · DESIGNER

Hi, I'm **Paolo**. I started my journey as a front-end developer through my studies, and the world of web design and motion graphics caught my attention and ignited a passion to create unique and immersive experiences that blend creativity and pragmatism.

I thrive on taking on **new challenges** and **learning new tools**. As a fast learner, I love finding creative solutions to problems, both big and small. When I'm not busy with that, you can find me playing video games, watching musicals, and creating my own illustrations, sewing or learning photography.

### Tool Expertise

Figma, Miro, Adobe, Affinity, Notion, Blender, React, Office

### Skills

Testing, User flows, Branding, Animation, Product Design, Prototyping, Design sprints

### Studies

#### Design Diploma @ Galdus

2015 - 2016

#### IT Diploma @ ITSOS

2010 - 2015

### I also like...

Videogames, sewing, drawing, musicals, photography and cooking

### Experience

#### Product Designer @ Bemind

2021 - Present

Bemind is a product design studio that creates products from scratch, including design, prototyping, and development. I'm working as a consultant with various clients, providing product design services for their projects.

#### Web designer @ IES Italia

2016 - 2019

IES Italia is a start-up that specializes in data processing, communication systems, and blockchains. My main roles at the company have been as a web designer, video maker, brand designer, PR representative, and illustrator.

#### UI Intern @ Girasolemedia

2014 - 2015

I completed a short internship with Girasolemedia, a web agency based in Milan. During my internship, I primarily created websites using basic web development languages and CMS. Additionally, I ensured that I followed SEO best practices for each website.
